Test 07

Read the following passage and answer the questions given on it.

Squirrels are the most resourceful animals in the world. They have the knack of saving up for rainy days. Autumn can be very entertaining for them. That is the time when they begin the great harvest collection for their winter store. You can see them scampering here and there, collecting nuts of all sorts: walnuts, beechnuts, chestnuts, dried berries etc... They are not fussy. Relentlessly, they run from their storage point, usually a tree hollow, to the vast amount of wild nuts to be found in the forest.

These beautiful animals are house – proud. They take great pains to ensure that their nest is secure and warm enough to tide them over the harsh winter. You will see them busily collecting soft pieces of bark, wood and leaves to line their nests. After all their scavenging is done, and when the first, cold hard frost arrives, they will seal themselves inside their nests for the duration of the cold spell. There, they will hibernate till it is warm enough to bring out their stored food. Ah, but then again they are the most forgetful little animals! It is not unusual to see squirrels searching desperately for their hoards.

1). What is the period that can be very entertaining for the squirrels?

.....

2). What do they do during this period?

.....

3). What do they usually use as their storage point?

.....

4). What do the squirrels use to line their nests?

.....

5). Write a sentence from the passage which proves that the squirrels are the most forgetful animals?
